specialising in Financial Planning and Accounting

Chris Reed, Director of Business Concepts Group

CPA, FPS SMSF Specialist Advisor

Episode 9 – Superannuation

For business owners who are mapping their way to retirement, it is important to ask – what does your SuperFund look like?

If your answer doesn't provide any comfort, it's time to think about planning in that area and look at how you can create some wealth outside of your business.

Currently, it is possible for business owners to accumulate wealth faster through Superannuation than it is by investing in identical assets outside of Superannuation.

To help you to get up to speed with your own Superannuation, Sarah and Chris address the different aspects of Superannuation and the area of highest complexity – SMSF, being the absolute key for acquiring wealth for business owners.

Generally, it is the most protected environment from bankruptcy and creditors and it also makes for a wise investment strategy due to its tax effectivity.

A Super Fund provides greater flexibility and potential returns which can help you build a nest egg that you can later use as a retirement income. So right from the start, Superannuation should really be part of your planning and structure whether it be a retail Fund or a self- managed Super Fund.

Now you can take the first step to planning your financial future and it doesn't have to be a daunting experience. As experts in this area, Business Concept's Group can provide you personalised strategy advice to help you reach your goals.
